

## SHAPE's Unique Advanced Formula: Nanomolecular Dietary Supplement

<https://shapereclaimed.com/shape-reclaimed-patient-education/nanomolecular-dietary-supplement/>

Our SHAPE Nanomolecular Dietary Supplement uses only the highest quality, organic and wildcrafted raw materials. It is safe, effective and hormone-free, and we do not use any synthetic fillers, binders, corn ethanol, preservatives or color stabilizers.

Because of the pure nature of this product, some color variation is normal, even within the same batch. The SHAPE Nanomolecular Dietary Supplement contains activated vegetable charcoal, which is an excellent detoxifier. It also may give the liquid a grayish color, especially after shaking the bottle. This slight coloration is normal, and the product is still safe and effective.

We chose each ingredient in our SHAPE Nanomolecular Dietary Supplement for a specific purpose to support you during your SHAPE ReClamed journey.

<b>Ingredient</b>	<b>Nutritionally Supportive Function</b>
<b>Lyophilized pituitary bovine gland, hypothalamus bovine gland, placenta ovine</b>	Supports neurological and hormonal systems, maximizing metabolic function. "Lyophilized" means freeze-dried.
<b>Sodium phosphate</b>	Helps to balance pH, which helps with mineral balance and distribution and proper hydration.
<b>Sodium chloride</b>	Helps with fluid balance, constipation and water retention.
<b>Potassium phosphate</b>	Assists with sleep, mood, exhaustion and dizziness.
<b>Magnesium phosphate</b>	Decreases muscle cramping.
<b>Calcium carbonate</b>	Supports pituitary and thyroid function, helps eliminate belly fat, provides whole body support.
<b>CoQ10</b>	Supports energy production at a cellular level.
<b>Strychnine tree seed</b>	Aids digestion, especially after overindulgence; helps with liver/gallbladder function.
<b>Graphite</b>	Supports anyone with a tendency toward obesity, chronic constipation, dry/cracked skin or excessive hunger.
<b>Club moss (spores/leaves)</b>	Supports liver/gallbladder function; relieves gas, bloating and indigestion.
<b>Greater celandine root</b>	Supports gallbladder and fat metabolism.
<b>Activated charcoal</b>	Supports removal of toxins.
<b>Bladderwrack</b>	Supports thyroid, boosts metabolism.
<b>Pokeweed root</b>	Helps to suppress appetite and reduce cravings.
<b>Chasteberry</b>	Supports hormone balance and function.

<b>Star of Bethlehem (Bach Flower Remedy)</b>	Assists with the emotional aftereffects of trauma.
<b>Mustard (Bach Flower Remedy)</b>	Helpful when one feels deep gloom for unknown reasons.
<b>Oak (Bach Flower Remedy)</b>	Helps make one “sturdy,” strong in adversity or able to let go.
<b>Goldenrod (aerial parts)</b>	Helps reduce pain and swelling; may have a diuretic effect; helps stop muscle spasms; provides herbal nutritional support for gout, joint pain, arthritis, eczema and other skin conditions.
<b>Berberine root bark, Oregon grape root, Chinese goldthread root</b>	Offers antibacterial, anti-inflammatory and immune-enhancing properties; supports blood purification, kidney function and blood sugar metabolism.
<b>Amino acids: arginine, cysteine, leucine, proline, serine, threonine, valine</b>	Supports energy production, metabolism, blood sugar and digestion.

### **What is nanomolecular nutrition?**

Nanomolecular nutrition is the science of using small amounts of natural materials to activate the root of a problem and stimulate the body’s inherent ability to heal — physically, mentally and emotionally.

Western science has been marching toward the discovery of increasingly smaller particles of matter for centuries — from molecules and atoms to subatomic particles, such as quarks. ‘Nanomolecular’ refers to the manipulation of individual molecules.

Therefore, a nanodose is literally a dose that can be measured in molecules. Nanodoses are more bioavailable, are better absorbed, can pass more easily through cell membranes and the blood-brain barrier, and may often be significantly safer and more effective than regular doses of the same substance. This is in large part due to their minute size.

You might be wondering, if the doses are so small, how can they have any effect? With nanomolecular nutrition, it’s not just about the quantity; it’s also about the *potency*. The process of creating nanomolecular nutritional formulas produces a final product that can be more potent than even an herbal extract. This process allows you to take less of a given substance while getting a greater benefit. In other words, if you were to take a regular dose of each of the ingredients listed above, you’d be taking 50 pills a day, but the pills wouldn’t work as well.

For instance, with chasteberry, both the whole plant version and nanodose help with hormone balance, but the nanodose is likely far better absorbed and utilized. With the ingredient strychnine, the whole plant version of can cause diarrhea and vomiting, but a nanodose of strychnine can actually alleviate or prevent diarrhea and vomiting. Nanomolecular strychnine is a common remedy for food poisoning and upset stomach in children and adults.

The efficacy of nanodoses has been scientifically validated over and over again as referenced throughout the large body of evidence from controlled clinical studies, epidemiological data, clinical outcome trials and historical review of the field. Our unique, advanced SHAPE Nanomolecular Dietary Supplement, which is based on decades of research, has been proven effective across thousands of patients since 2010.
